1. Jim Garrison and [REDACTED] were up to brief me on their facts concerning the possibility of consolidating the Administration Building Printing Plant with the [REDACTED] Street Plant. They do not believe that it is feasible and I have concluded that we should not pursue the matter further at this time. In this connection, we also agreed that they should plan to expand the Administration Building Printing Plant into the basement of the East Building when we move to Langley. In addition, it may be necessary for them to have some office space on the first floor of either the Administration Building or the East Building. This can be done without difficulty and all of the machinery still kept in the basements of these two buildings. H

2. [REDACTED] was in to talk to me about the problems of the Photographic Intelligence Center and I agreed to go over there for a full-scale briefing on Friday afternoon, the 4th of March.
